SURIYA V

AI ENGINEER

suriya1252004@gmail.com • +91 7358918032

Portfolio • LinkedIn • GitHub • HackerRank

PROFESSIONAL SUMMARY

AI Engineering graduate specializing in **LLMs, RAG, and Deep Learning**. Hands-on experience building context-aware AI agents and multimodal sentiment solvers using **LangChain, PyTorch, and transformer models**. Focused on deploying efficient, high-accuracy AI solutions to solve complex automation challenges.

TECHNICAL SKILLS

AI & GENAI:
LLMs (Llama 3, GPT-4), LangChain, RAG Systems, Prompt Engineering, Vector Databases (ChromaDB, Pinecone)

PROGRAMMING:
Python (Pandas, NumPy), SQL (PostgreSQL, MySQL), MongoDB

MACHINE LEARNING:
Deep Learning (PyTorch, TensorFlow), NLP, Computer Vision, Scikit-learn, Hugging Face

TOOLS & CLOUD:
Git/GitHub, Docker, VS Code, Google Colab, Jupyter Notebooks

EXPERIENCE & INTERNSHIPS

DLK - AI Implementation Intern

July 2024 - August 2024

- Developed an **Intelligent Fire Detection System**, implementing real-time anomaly detection algorithms using Python and computer vision.
- Configured sensor data streams for environmental monitoring, utilizing statistical models to identify temperature fluctuations and hazards.
- Optimized detection accuracy by 15% through feature engineering and calibration of IoT sensor inputs.

KEY PROJECTS

Enterprise AI Chatbot with RAG

LangChain, Pinecone, Llama 3, Python, FastAPI, React

- Engineered a scalable **Retrieval-Augmented Generation (RAG)** pipeline to enable intelligent querying of multi-format documents (PDF, DOCX, web data) with context-aware responses.
- Implemented semantic search using Pinecone vector database and embeddings, improving information retrieval speed and reducing manual search effort by 50%.
- Developed an interactive chat interface that allows users to upload documents and ask questions, ensuring accurate and hallucination-free responses through advanced prompt engineering.

Smart Text Expander & AI Writing Assistant

JavaScript, Chrome Extension API, HTML, CSS, OpenAI API

- Developed a browser extension that provides real-time text expansion using custom shortcuts (e.g., "wt" → "what", "1" → "Suriya") across web applications.
- Implemented an intelligent suggestion system that detects user input and displays dynamic auto-complete recommendations with keyboard navigation support.
- Integrated AI-powered writing assistance to generate context-aware sentence suggestions, improving typing speed and user productivity.

EDUCATION

B.Tech in Artificial Intelligence & Data Science

2022 - 2026

MIET Engineering College, Trichy **CGPA: 7.8**

CERTIFICATIONS & ACHIEVEMENTS

- **Python (Basic & Intermediate)** – HackerRank Certification.
- **SQL (Basic)** – HackerRank Certification.
- **Active Contributor:** Solved 50+ Algorithmic challenges on LeetCode/HackerRank.
